

PLAYARDS

FROM TRAVEL TO ALL-PURPOSE

Playards (formerly known as 'Playpens') are a great way to keep baby close in a safe, comforting environment. The portability of playards allows you to bring that security and comfort everywhere you go, especially homes or places you may not consider 'baby proof'. Kolcraft playards are intended to be used with children who cannot climb out of the playard and are less than 35 inches tall.

On the market today, you can find playards of all shapes, sizes and prices. Lower price playards typically offer the traditional travel playard with no accessories. As the price rises, more accessories are added making the playard an all-purpose product.

HERE ARE SOME FEATURES TO CONSIDER:

Bassinets

Bassinet attachments are used with infants under 3 months or under 15 lbs. Bassinets elevate the floor of the playard to keep infants in sight and within easy reach. The bassinet attachment is removable once your child exceeds the age and/or weight restrictions listed above.

Changing Tables

A changing table attachment is a convenient feature, especially when traveling. This removable feature separates the sleeping area from the changing area and is positioned at the top of the playard for easy reach of the parent. Like the bassinet attachment, changing tables are used with infants under 3 months or under 15 lbs.

Electronics

Whether it is soothing vibrations, music, nature sounds or a check light, playard electronics can provide a world of entertainment to comfort and soothe baby. Electronics typically attach to the top rail of the playard within easy reach of the parent. The electronics are battery operated and most models feature automatic shutoff to preserve the life of the batteries. Playard electronics are removable and most effective when used with a bassinet attachment.

Parent Organizers

These playard attachments provide accessible storage for diapers, baby wipes and more. Organizers are attached to the outside of the playard within easy reach of the parent.

Floor Activity Gyms

Some Kolcraft models include removable floor activity gyms to create a great 2-in-1 product. Floor activity gyms utilize the playard floor pad and toy bar attachment for visual stimulation. Floor gyms are great for close baby/parent interaction.

Soft Toy Mobiles

For great visual stimulation, a soft toy mobile can captivate and entertain baby. Toy mobiles are removable and best used with the bassinet attachment.

Canopies and Roll-Down Screens

Canopies and roll-down screens provide great protection for your child, especially if the playard is used outdoors. Roll-down whether screens not only protect from direct sunlight, but also against drafts.

Travel Bags

A standard accessory in playards, folded playards fit into this convenient carry bag for easy portability and storage. On our Jeep models, the playard wheels are exposed so that you can roll the bag when you travel.

Casters or Wheels

Another standard accessory in playards, casters or wheels allows the playard to be moved from room to room without disassembling. Most casters and wheels have a locking feature to keep the playard stationary when in use.

Be sure to refer to your product instructions before assembling or using your products.
