

WALKERS, WALK-BEHINDS & ACTIVITY CENTERS

SOOTHING AND FUN FOR DAYTIME CARE

WALKERS

Walkers should only be used by children who meet the following requirements:

- Can support body weight with legs
- Weight is between 15 and 26 lbs
- Height is less than 32 inches

Here are some features to consider:

Safety Friction Strips

Kolcraft walkers feature a wide base and safety-friction strips to help keep baby safe.

Activity Toys

Basic models of walkers include simple batting and spinning toys, while more deluxe models include electronic toys with lights and music to keep your baby occupied.

Height Adjustment

Since babies come in all shapes and sizes, it's important for walkers to have height adjustment to conform to your baby's size. Height adjustment will either be in the legs or in the seat pad.

Grow with Me

Kolcraft's Tiny Steps 2-in-1 Walker begins as an activity walker, but then converts to a walk-behind when your child is ready to begin walking. 2-in-1 features extend the life of your product, provides a better value for your investment and save space in your home.

ACTIVITY CENTERS

Activity Centers offer a world of discovery and entertainment, while providing you with a safe and secure environment to place your baby in when it's play time. Your child is surrounded by a variety of developmental activities designed to not only capture their attention and entertain, but to help develop and hone basic motor skills. Activity Centers are designed for children under 30 lbs and less than 30 inches tall and for children that can support their body weight with their legs and sit up unassisted.

Activity Toys

Kolcraft Activity Centers rock, spin and bounce, in addition to a tray full of activities and toys including spinning toys, mirror, ball-drop play, electronic toys and cause & effect toys.

Height Adjustment

Kolcraft Activity Centers have height adjustment in the seat pad to conform to your baby's growing needs.

Grow with Me

Kolcraft's Baby Sit & Step 2-in-1 Activity Center converts to a walk-behind when your child is ready to begin walking. 2-in-1 features extend the life of your product, provides a better value for your investment and save space in your home. Be sure to refer to your product instructions before assembling or using your products.
